

1. **Photo Competition**- Take a photo and submit it. It sounds easy right? Here's the catch. You must submit a photo (it can be one you have taken yourself, or one you find online) and have a mathematical question attached to it. For example, you could send in a photo of a group of people and ask the question:

-What is the probability that a person selected at random from the group will have brown hair?

Or a photo of a football pitch and ask us to find the area and perimeter of the field.

Hint: The marks are being awarded for the most creative question asked, so get thinking. You can also submit more than one question with each photo.

2. **Maths Poster Competition**- Design and submit a maths themed poster. This can be in relation to any mathematical concept. The poster can be designed on A4 or A3 sheet.

There will be a prizes for the best Senior and Junior entries.

Please submit all entries to Ms. Clifford on or before 9am Friday 18th October in Room 9.

Get that thinking cap on and best of luck to all entrants!
