

From I Wish School Liaison Officer

I would like to take this opportunity to thank you for taking part in IWish 2021 and I hope that you and your students enjoyed the event. Your opinion matters to us, so I would like to reach out to you and ask if your students have completed the IWish Survey. This feedback greatly helps us to make sure we are meeting the needs and expectations of all the students, so on that note, if they haven't done so already, I would greatly appreciate if you could encourage them to do so. Please see following the link in case they have already deleted the App.

<https://forms.gle/XFJmNpfck542LyWb8>

Also I would like to share with you a very exciting opportunity that has been made available by Arup to IWish Students, the details are as follows and I hope that some of your students will avail of this.

We run a Transition Year programme to enable students to explore the world of engineering and we have set aside places for students who attended I Wish. During this virtual work experience week, students are tasked with designing a building with the full support of our graduate engineers. This involves hearing from each of the disciplines and learning how to apply each one to the building. The students get to decide the use of the building themselves (during previous weeks, students have designed concert venues, theme parks and many other types of buildings, so deciding on the use of the building is part of the fun).

We have availability during the weeks listed below. Students who are interested can get in touch by emailing typrogramme@arup.com to let us know that they attended I Wish and would like to reserve a place on the programme.

TY programme availability during the weeks commencing:

- 22 March
- 6 April
- 12 April
- 26 April
- 3 May

Kind regards,

Deirdre Cremin
